1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes have been made to the subject application:

Claim 5:

Line 4, "signal" has been changed to --signals--.

Claim 7:

Line 4, "signal" (first occurrence) has been changed to --signals--.

Claim 11:

Line 4, "signal" has been changed to --signals--.

Claim 12:

Line 4, "signal" has been changed to --signals--.

The changes have been made in order provide antecedent basis for the local oscillation signals and to place the application in a condition for allowance.

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest the combination of signal generating means for generating first and second local oscillator signals substantially in anti-phase with each other, said signal generating means being arranged to feed said first local oscillator signal to the source of said first field effect transistor and the second local oscillator signal to the source of said second field effect transistor, an input means coupled to said drain for receiving an input signal of the mixer as called for in claims 1 and 15. Therefore, claims 1-15 are presently allowed.
